

I am an Extra Class ham radio operator and was first licensed in 1965. I am also retired from a power plant as an Instrument and Control technician. I live in a VERY rural area where high speed internet access is NOT available. I am FORCED to use a dial up connection. I agree with and support 100 percent using power lines for broadband internet access. Furthermore it will benefit all current users of high speed access by providing more competition and should result in lower rates. Please APPROVE this matter AS SOON AS POSSIBLE. KC0EH...Charles O.
